Director of Commerce & Industries,

Solar Street Lighting System – Technical Specifications

Integrated PV Module LED-based Solar Street Light with LiFePO₄ Battery with aesthetically designed outdoor lighting optic luminaire of IP 66, complete in all respect of given capacity, necessary control electronics-inter connecting wires/cables, module mounting, etc.

Dusk to Dawn Lighting with Automatic On/Off, operating from dusk to dawn first four hour full brightness, rest of the time at lower level, with motion sensor.

White Light Emitting Diode (W-LED) dispersed beam, free from glare and flickering, soothing to the eyes with the use of proper optics and diffuser and should not emit ultraviolet light

Type of LED (Light source) \geq 20 Watt White LED type

Standard light profile, average lighting beam angle 120 degree,

Only indigenous modules of reputed brand IEC Tested/conforming to BIS Standards shall only be used.

Power output of PV Module \geq 75 Wp at 16.4 \pm 0.2 Volt at STC with minimum efficiency of 14%

Charge controller should be MPPT type and no load current should be $<$ 20 mA.

Battery capacity \geq 12.8 V (nominal), 30 Ah Lithium Ferro Phosphate (LiFePo₄) battery conforming to latest BIS standards.

The temperature of heat sink \leq 20 degree centigrade above ambient temperature during operation

Thermal management system should be provided and LED must be mounted on heat conductive aluminum sink with suitable large are surface be means of fins to dissipate the heat to ambient air.

Over voltage protection and full protection against open circuit, accidental short circuit and for reverse polarity should be provided. The system should have protection against battery overcharge and deep discharge conditions.

Overall total Efficiency of the Electronics should be Minimum 90%

3 days or Minimum 36 operating hours per permissible discharge with fully charged Battery

Provided with 2 LED indicators: a green light to indicate charging in progress and a red LED to indicate deep discharge condition of the battery. The green LED glow only when the battery is actually being charged.

Ingress Protection = IP65 or better

Pole should be Hot Dip Galvanised pipe with provision to hold the luminaire.

Height of pole should be 5m above the ground level and 1m below the ground. Luminaire shall be at least 4.5m above the ground level.

Frame structure should have provision that the module can be oriented at the suitable tilt angle

Housing should be of pressure die cast aluminum with corrosion resistance polyester powder coated

Impact resistance > IK 08.

The PV module must be warranted for a minimum period of 25 years. The PV module must be warranted for output wattage, of the which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

With 3-5 years comprehensive warranty against any manufacturing defects & maintenance across the State of Meghalaya.

An Operation, Instruction and Maintenance Manual, in English, should be provided with the Solar Street Lighting System which must include basic principles of Photovoltaics, block diagram, components of the system, instructions on regular maintenance and troubleshooting, Do's & Don'ts, name and address of contact persons in case of non-functionality of the street lighting system.
